EXPERIMENT N0-7

7. Write a C program for the following ciphertext was generated using a simple substitution algorithm.

53‡‡†305))6*;4826)4‡.)4‡);806*;48†8¶60))85;;]8*;:‡*8†83

Decrypt this message.

1. As you know, the most frequently occurring letter in English is e. Therefore, the first or second (or

perhaps third?) most common character in the message is likely to stand for e. Also, e is often seen in

pairs (e.g., meet, fleet, speed, seen, been,

agree, etc.). Try to find a character in the ciphertext that decodes to e.

2. The most common word in English is “the.” Use this fact to guess the characters that stand for t and h.

3. Decipher the rest of the message by deducing additional words.
